Submission DSA1-FINAL-SUB07

Question DSA1-FINAL-Q01
beginning only... show step
7>4, go right; 7<9, go left; 7>6, go right.
[blank space]
I did not reach a conclusion

Question DSA1-FINAL-Q02
beginning only... show step
Maintain a hash set of values seen so far.
[blank space]
I did not reach a conclusion

Question DSA1-FINAL-Q03
beginning only... show step
A balanced tree can be built recursively by choosing the median, with each key visited once: $\Theta(n)$.
[blank space]
I did not reach a conclusion

Question DSA1-FINAL-Q04
beginning only... show step
Queue A; discover B,C; then dequeue B and discover D; dequeue C and discover E.
[blank space]
I did not reach a conclusion

Question DSA1-FINAL-Q05
beginning only... show step
Invariant: the prefix before index i is sorted and contains the original prefix values.
[blank space]
I did not reach a conclusion

Question DSA1-FINAL-Q06
beginning only... show step
7>4, go right; 7<9, go left; 7>6, go right.
[blank space]
I did not reach a conclusion

Question DSA1-FINAL-Q07
beginning only... show step
Maintain a hash set of values seen so far.
[blank space]
I did not reach a conclusion

Question DSA1-FINAL-Q08

beginning only... show step

A balanced tree can be built recursively by choosing the median, with each key visited once: $\Theta(n)$.

[blank space]

I did not reach a conclusion

Question DSA1-FINAL-Q09

beginning only... show step

Queue A; discover B,C; then dequeue B and discover D; dequeue C and discover E.

[blank space]

I did not reach a conclusion

Question DSA1-FINAL-Q10

beginning only... show step

Invariant: the prefix before index i is sorted and contains the original prefix values.

[blank space]

I did not reach a conclusion
