Submission STAT1-MID-SUB08

Question STAT1-MID-Q01
scan faint / margin cut off
visible work:
x■=25/5=5.00... ?
last line is hard to read; maybe mean=5.00; sample variance=14.00

Question STAT1-MID-Q02
scan faint / margin cut off
visible work:
P(D■∩D■)=(5/16)((5-1)/(16-1))... ?
last line is hard to read; maybe 0.0833

Question STAT1-MID-Q03
scan faint / margin cut off
visible work:
SE=√(p■(1–p■)/n)=√(0.55(1–0.55)/40)=0.0787... ?
last line is hard to read; maybe (0.396, 0.704); repeated-sampling interpretation

Question STAT1-MID-Q04
scan faint / margin cut off
visible work:
Increase sample size n to reduce standard error.... ?
last line is hard to read; maybe increase n; lower confidence level or variability; note the coverage trade-off

Question STAT1-MID-Q05
scan faint / margin cut off
visible work:
0.03 < 0.05, so reject H■ under the stated rule.... ?
last line is hard to read; maybe reject H0; evidence against H0, not proof that H0 is false

Question STAT1-MID-Q06
scan faint / margin cut off
visible work:
x■=35/5=7.00... ?
last line is hard to read; maybe mean=7.00; sample variance=4.50

Question STAT1-MID-Q07
scan faint / margin cut off
visible work:
P(D■∩D■)=(5/19)((5-1)/(19-1))... ?
last line is hard to read; maybe 0.0585

Question STAT1-MID-Q08

scan faint / margin cut off

visible work:

SE=√(p■(1–p■)/n)=√(0.35(1–0.35)/40)=0.0754... ?

last line is hard to read; maybe (0.202, 0.498); repeated-sampling interpretation
