

Financial Accounting QUIZ

Show equations, substitutions, intermediate reasoning, and a final labeled answer.

1. [8 pts] Record: receive \$531 cash for a service already performed; purchase \$466 of supplies on account. Give both journal entries and the immediate effect on the accounting equation.

2. [7 pts] A \$753 prepaid service contract covers 6 months. After one month, give the adjusting entry and remaining liability.

3. [5 pts] At period end, assets are \$1627 and liabilities are \$562. Compute equity and explain the balance-sheet relationship.

4. [6 pts] Current assets are \$1709 and current liabilities are \$1085. Compute the current ratio and interpret values above 1.

5. [5 pts] A customer pays before delivery. Explain when revenue is recognized and name the liability recorded before performance.
