

Submission CALC1-MID-SUB08

Question CALC1-MID-Q01

scan faint / margin cut off

visible work:

$$f'(x) = 2x(2x-1) + (x^2+4)^2 \dots ?$$

last line is hard to read; maybe 10

Question CALC1-MID-Q02

scan faint / margin cut off

visible work:

$$\int 2x \, dx = (2/2)x^2 \dots ?$$

last line is hard to read; maybe 9

Question CALC1-MID-Q03

scan faint / margin cut off

visible work:

$$2w+2l=22 \Rightarrow l=11-w \dots ?$$

last line is hard to read; maybe $A(w)=w(11-w)$; $A(8)=24$; check $A'(w)=0$

Question CALC1-MID-Q04

scan faint / margin cut off

visible work:

$$x^2-16=(x-4)(x+4) \dots ?$$

last line is hard to read; maybe 8

Question CALC1-MID-Q05

scan faint / margin cut off

visible work:

Critical point: $f'(c)=0$ or $f'(c)$ is undefined (when f is defined).... ?

last line is hard to read; maybe critical point: $f'(c)=0$ or undefined; + to – sign change gives a local maximum

Question CALC1-MID-Q06

scan faint / margin cut off

visible work:

$$f'(x) = 2x(2x-1) + (x^2+2)^2 \dots ?$$

last line is hard to read; maybe 14

Question CALC1-MID-Q07

scan faint / margin cut off

visible work:

$$\int 2x \, dx = (2/2)x^2 \dots ?$$

last line is hard to read; maybe 16

Question CALC1-MID-Q08

scan faint / margin cut off

visible work:

$$2w+2l=24 \Rightarrow l=12-w \dots ?$$

last line is hard to read; maybe $A(w)=w(12-w)$; $A(9)=27$; check $A'(w)=0$
