

Submission MICRO1-QUIZ-SUB03

Question MICRO1-QUIZ-Q01

started with a familiar rule, but the key condition is wrong:

$$49 - 2P = 5 + P \Rightarrow P^* = (49 - 5) / (2 + 1) = 14.67$$

I treated variables/constraints as independent, so this conclusion is not justified.

Question MICRO1-QUIZ-Q02

started with a familiar rule, but the key condition is wrong:

$$\% \Delta Q = -3 / 28.5$$

I treated variables/constraints as independent, so this conclusion is not justified.

Question MICRO1-QUIZ-Q03

started with a familiar rule, but the key condition is wrong:

Shift the wedge between buyer and seller prices by t .

I treated variables/constraints as independent, so this conclusion is not justified.

Question MICRO1-QUIZ-Q04

started with a familiar rule, but the key condition is wrong:

$SMC = PMC + \text{marginal external cost}$, so SMC lies above PMC .

I treated variables/constraints as independent, so this conclusion is not justified.

Question MICRO1-QUIZ-Q05

started with a familiar rule, but the key condition is wrong:

At the ceiling, Q_d exceeds Q_s .

I treated variables/constraints as independent, so this conclusion is not justified.
