

Submission PHYS1-QUIZ-SUB05

Question PHYS1-QUIZ-Q01

alternate method (not the requested one):

rough work -> [arrow] [arrow]

I get $v=9$ m/s; displacement= 12 m, but skipped the required derivation/justification.

Question PHYS1-QUIZ-Q02

alternate method (not the requested one):

rough work -> [arrow] [arrow]

I get $a=1.90$ m/s²; friction opposes motion, but skipped the required derivation/justification.

Question PHYS1-QUIZ-Q03

alternate method (not the requested one):

rough work -> [arrow] [arrow]

I get $v=12.52$ m/s, but skipped the required derivation/justification.

Question PHYS1-QUIZ-Q04

alternate method (not the requested one):

rough work -> [arrow] [arrow]

I get total momentum before equals after when external impulse is negligible, but skipped the required derivation/justification.

Question PHYS1-QUIZ-Q05

alternate method (not the requested one):

rough work -> [arrow] [arrow]

I get impulse= 3 N·s; momentum changes by 3 kg·m/s, but skipped the required derivation/justification.
