

Submission STAT1-QUIZ-SUB08

Question STAT1-QUIZ-Q01

scan faint / margin cut off

visible work:

$$\bar{x} = 39/5 = 7.80 \dots ?$$

last line is hard to read; maybe mean=7.80; sample variance=9.70

Question STAT1-QUIZ-Q02

scan faint / margin cut off

visible work:

$$P(D_1 \cap D_2) = (2/14)((2-1)/(14-1)) \dots ?$$

last line is hard to read; maybe 0.0110

Question STAT1-QUIZ-Q03

scan faint / margin cut off

visible work:

$$SE = \sqrt{(p(1-p)/n)} = \sqrt{(0.35(1-0.35)/40)} = 0.0754 \dots ?$$

last line is hard to read; maybe (0.202, 0.498); repeated-sampling interpretation

Question STAT1-QUIZ-Q04

scan faint / margin cut off

visible work:

Increase sample size n to reduce standard error.... ?

last line is hard to read; maybe increase n; lower confidence level or variability; note the coverage trade-off

Question STAT1-QUIZ-Q05

scan faint / margin cut off

visible work:

$0.03 < 0.05$, so reject H_0 under the stated rule.... ?

last line is hard to read; maybe reject H_0 ; evidence against H_0 , not proof that H_0 is false
